

# Qrimp for Former Web Office Customers

Qrimp lets you manage your data from the web

Build your ideas with us.  
Build your business with us.

## Automated Data Migration

To make the transition to Qrimp easier for previous WebOffice customers, we have an automated import tool for your WebOffice documents and databases. We can help you export your data from WebOffice, and import it to Qrimp.

### How?

When you backup your WebEx WebOffice application you get an email with information on how to access a compressed archive of your files. We connect to your FTP backup location, copy the files to your Qrimp app and import your documents records. If we do this in a web meeting, you can enter your own password to access to the Documents archive.

Id	Name	Description	Notes	Is Template
1	Term Sheet	...	...	N
2	Potential Customer Questions	...	...	N
3	Purchase Agreement	...	...	
4	Sales Contract	...	...	
5	Employee Phone Numbers	...	...	
6	Emergency Procedures	...	...	
7	Admin Binder	...	...	

## Databases, Documents, Calendars and more!

Qrimp has most of the same features as WebOffice plus a lot more. One great benefit of Qrimp is that it allows all of your documents, calendars and other files to work together, as they are connected to each other in a relational way. We can handle any type of database table, and any size, up to millions of records. Plus we have the best customer service in the industry!

Contact us today for information about migration assistance. We look forward to hearing from you.
